CAREER OBJECTIVE

Aspiring software/data engineer with a strong desire to make an impact in the field. I am actively exploring a variety of technologies in various subfields such as Augmented Reality and Stable Diffusion.

EDUCATION

California State University, Fullerton, Fullerton, CA
Bachelor of Science, Computer Science May 2025
Dean's List

Norco College, Norco, CA
Associate of Science (AS), Computer Science December 2022
Dean's List

Riverside City College, Riverside, CA
Associate of Science (AS), Math and Science June 2020
Dean's List

TECHNICAL SKILLS

- C++, Python, JavaScript - React.js
- CSS, HTML5
- Unity – C#, Mixed Reality
- OOP, Data Structures
- Git, GitHub
- Windows, MacOS, Linux
- Excel, R, MATLAB

INTERNSHIP EXPERIENCE

CIC PCUBED - CSUF Fullerton, CA
Summer Research Student June 2023 - August 2023

- Developed a data science project to predict GPA using SAT and ACT scores
- Processed and transformed data to prepare for modeling
- Performed feature engineering to enhance model performance
- Utilized regression algorithms for accurate GPA predictions
- Validated models through cross-validation and evaluation metrics

Assure-US – Artificial Intelligence Division Fullerton, CA
Summer Research Student May 2023 - August 2023

- Utilized and implemented an AI project using Genetic Programming (GP) to speed up a specific process, boosting program fitness from random, unfit beginnings.
- Applied machine learning libraries to perform symbolic regression, significantly revamping data modeling accuracy and accelerating the process.
- Identified and developed optimal mathematical expressions, driving precise understanding of underlying relationships and streamlining operations.
- Developed 3D graph visualizations for the mathematical models, promoting enriched data interpretation, accelerating insights generation, and facilitating faster decision-making.

BRDG-- bridge-to-connect.org Orange County, CA
Ambassador/Intern January 2023 - Present

- Oversee website content, monitor website content to assure accuracy, relevance, and timeliness
- Applied SEO best practices to optimize website content for search engines and improve visibility
- Take part in professional development programs offered by employer or industry associations advance career and boost knowledge and skills
- Engaged in workshops to develop and enhance technical and soft skills, applying new communication, problem-solving, and project management strategies to real-world projects.
- Connect with industry professionals at engineering conventions and networking events to gain insight into field and build a professional network

NAVSEA Corona, CA. Fallbrook, CA
Computer Scientist/Mechanical Engineer Intern June 2022 - September 2022

- Led data science projects; analyzed PETG 3D prints, collected data for machine learning algorithms.
- Created an AR environment for Digital Multimeter (DMM) calibration, reducing training time and increasing calibration accuracy
- Used CAD-FEM software for material design and specimen support.
- Explored Augmented Reality (AR) technology applications for military and corporate use, leading to new potential partnerships
- Utilized Unity, Mixed Reality Toolkit, Pace lab WEAVER, Blender, C#, and C++ to deploy to the Hololens 2, enabling faster development timelines
- Streamlined reporting processes and enhanced data-driven decision making using Excel and MATLAB for data analysis, migration, and presentation
- Analyzed data from prints to input into the deep neural network algorithm, enabling the pre-determination of optimal printing conditions, increasing efficiency and reducing costs
- Managed entire process of manufacturing steel 3D printed specimens, from pre-procurement to post-procurement, ensuring quality and timely delivery
- Additional Skills Utilized: Python, Pandas, Numpy, Jupyter, computer vision, CAD, Unity, augmented reality
- Obtained secret security clearance

NCAS - NASA Pasadena, CA
Student Intern P2 April 2022 - June 2022

- Contributed to development of an autonomous obstacle avoidance system for the Mars Rover, applying advanced computer vision algorithms, sensor fusion, and machine learning techniques, including Convolutional Neural Networks (CNNs) and Reinforcement Learning (RL), to enable the Rover to intelligently navigate challenging terrain, avoid hazards, and adapt to unforeseen obstacles, thus increasing mission success rates, enhancing operational efficiency, and reducing risks to valuable equipment.
- Engaged in hands-on learning and research activities related to aerospace and space exploration, increasing knowledge and skills applicable to real-world challenges
- Demonstrated strong problem-solving and critical thinking skills by identifying potential challenges and designing effective solutions for unique environments on Mars, paving way for future exploration missions
- Attended virtual workshops, webinars, and completed online coursework focused on topics such as robotics, propulsion, and space exploration, staying current on latest advancements and trends in the field
- Connected with industry professionals and learned about career paths in the aerospace field, expanding professional network and identifying opportunities for collaboration

WORK EXPERIENCE

California State University, Fullerton Fullerton, CA
Web Developer Manager, Student Assistant May 2023 - Present

- Web Development, supervising and developing websites for the Transfer Center and Veterans Resource Center.
- Responsible for creating, overseeing and enhancing websites for the TAPP Center and Veterans Resource Center.
- My role involves managing and developing web projects, ensuring they meet the needs of our users and align with the organization's goals utilizing OU(OmniUpdate).

Casa Del Mar Beach Resort Remote
Web Developer - Freelance December 2021 - February 2022

- Collaborated closely with resort's management to design and devise a visually appealing, user-friendly, and responsive website
- Applied HTML, CSS, JavaScript, and jQuery to design engaging front-end design ensuring compatibility across various devices and browsers
- Optimized website for search engines (SEO) by implementing meta tags, keyword-rich content, and structured data to improve visibility and drive organic traffic to resort's website
- Configured and supervised web server, ensuring optimal performance, security, and uptime, while also implementing regular data backups and updates to prevent data loss and manage website stability
- Skills Utilized: HTML5, CSS, JavaScript, React.js, jQuery, Node.js, JSON web token (JWT), regex, Google Maps API, Git.

Glen Ivy Hot Springs Spa Temescal Valley, CA
Bartender Manager/Poolside Server April 2019 - March 2020

- Oversaw and supervised a team of poolside servers and bartenders, ensuring efficient and effective service of a wide range of cocktails, wine, and beer to guests across entire property
- Contributed to a significant increase in food/beverage sales through exceptional customer service, attention to detail, and seamless teamwork. As a result of efforts, awarded title of "Most Productive Employee" and received numerous positive reviews from guests, highlighting exceptional service, led to an increased number of returning guests
- Received positive feedback from guests and colleagues for exceptional service, adaptability, and professionalism, contributing to overall success and reputation of the establishment

California Baptist University Riverside, CA
Event Coordinator June 2018 - April 2019

- Leverage creativity and attention to detail to assure all events are executed with highest level of professionalism and quality
- Collaborate with internal teams and external partners to devise event themes, design, and messaging
- managed onsite events to assure a flawless execution, including managing vendors, coordinating logistics, and resolving any issues arise
- Managed vendors, budgets, and timelines for several different events ranging from basketball games to concerts

Norco College Disability Resource Center Norco, CA
Front Desk Clerk January 2018 - August 2018

- Communicated with staff and students by phone and email on a daily basis and prepared reports for students with disabilities as needed
- Checked in all students arrived at center and assisted with registration
- Set up appointments for students, guided through school resources, and provided note-taking services
- Utilized strong organizational skills, patience, and a compassionate approach to serve students with special needs

In-N-Out Norco, Ca
Associate June 2015 - February 2018

- Ensured customers received best possible experience by taking orders, cleaning, among other tasks
- Communicated with colleagues, cooks, and managers to meet needs of customers in a fast-paced environment
- Maintained a positive and friendly attitude, going above and beyond to ensure every customers well taken care of

United States Marine Corps Reserve (USMCR) Miramar, CA
7011 Expeditionary Airfield Systems Technician January 2014 - January 2018

- Maintained and repaired various systems and equipment at expeditionary airfields, including several different arresting gear models (M-31), airfield lighting MOSKIT/SALKIT systems, power generators, fuel systems, and other critical infrastructure
- Assisted with installation and setup of new systems and equipment as needed, and troubleshot any issues that arose
- Ensured overall safety and security of the airfield by performing safety checks, enforcing safety protocols, and responding to emergencies as needed
- Coordinated maintenance and repair activities with other team members and ensured all systems and equipment were operating efficiently
- Worked as part of a team that constructed the Old Harbor runways in Kodiak Island, Alaska, providing essential infrastructure for the local Native community.
- Through this experience, I developed a deep appreciation for the importance of reliable infrastructure in supporting communities in remote and challenging environments

EXTRA CURRICULAR ACTIVITIES

- Collaborated as a member of a rocketry group, contributing to the payload section of the team responsible for designing and testing the scientific equipment to be carried on the rocket.
- Utilized technical skills in computer science, including programming and data analysis, to develop and optimize the payload design and ensure reliable and accurate data collection.
- Demonstrated cross-cultural communication and adaptability skills by interacting with locals and navigating new environments with a diverse group of fellow students. Built strong relationships with peers and expanded professional networks through shared experiences and group activities
- Participated in a college travel club trip to Europe, visiting London, Paris, and Switzerland to explore culture and history of these iconic destinations. Engaged in experiential learning opportunities through guided tours, museum visits, and cultural events, gaining a deeper understanding of local art, music, and food scenes.
- I was selected as one of the 12 participants from CSUF to attend the Titans On The Road event, a unique opportunity that involved visiting Universal Studios and Telemundo Studios in Los Angeles. During this event, I had the privilege of interacting with seasoned industry professionals, allowing me to gain firsthand insights into their work environments. Engaging with these professionals provided me with the chance to pose meaningful questions pertaining to my major and potential career paths.
