EDUCATION

California State University, Fullerton, Fullerton, CA
Bachelor of Science, Computer Science Expected Graduation: May 2025
Relevant Courses: Data Structures, Operating Systems, Software Engineering Fund., Computer Architecture

Norco College, Norco, CA
Associate of Science, Computer Science, Math & Science December 2022
Relevant Courses: MASM, OOP, Computer Architecture 1

CAREER OBJECTIVE

A motivated Computer Science student with hands-on experience in web development and data analysis. Adept at collaborating in team environments, eager to contribute innovative solutions and grow professionally within a dynamic organization.

TECHNICAL SKILLS

- Programming Languages: Python, C#, C++, JavaScript, HTML5, CSS
- Tools & Technologies: React, Git, MySQL, AWS, Unity, Mixed Reality Toolkit, Blender, MATLAB, Excel, OmniUpdate
- Other Skills: Data Analysis, Machine Learning, SEO, API, Project Management, Event Coordination, Debugging, Software Testing

EXPERIENCE

California State University Fullerton Fullerton, CA
Web Developer Manager, Student Assistant May 2023 - Present
- Led upgrade of TAPP Center and Veterans Resource Center websites, enhancing user interface, integrating interactive features, and promoting SEO rankings to elevate user engagement and visibility
- Implemented CMS workflows in OmniUpdate, ensuring content accuracy and accessibility compliance
- Employed A/B testing with Optimizely and Google Analytics, raising user engagement by 25% and reducing bounce rate by 15% through CTA and content optimization

BRDG - Bridge To Connect Orange County, CA
Ambassador/Intern January 2023 - Present
- Managed content updates and SEO optimization using WordPress, increasing website traffic by up to 40%
- Conducted in workshops on AI, professional development, and data analytics, improving technical and professional skills

CIC PCUBED - CSUF Fullerton, CA
Summer Research Student June 2023 - August 2023
- Coded in Python and R for data cleaning, transformation, and feature engineering in a project predicting GPA from SAT/ACT scores
- Applied machine learning models, including linear regression and random forest, achieving a 90% accuracy rate
- Processed and transformed data, performed feature engineering, and utilized regression algorithms

Assure-US - AI Division Fullerton, CA
Summer Research Student May 2023 - August 2023
- Implemented genetic programming algorithms to optimize program fitness, enhancing computational efficiency by 25%.
- Leveraged TensorFlow and Scikit-learn for symbolic regression, deriving mathematical expressions to model complex datasets

NAVSEA Corona, CA
Computer Scientist/Mechanical Engineer Intern June 2022 - September 2022
- Led a team in analyzing PETG 3D prints, utilizing Python and MATLAB for data analysis and visualization executed into a ML DNN Algorithm project
- Crafted an Augmented Reality environment using Unity and Mixed Reality Toolkit for DMM calibration, boosting measurement precision and operational efficiency, resulting in streamlined processes and better data accuracy

NCAS - NASA Pasadena, CA
Student Intern P2 April 2022 - June 2022
- Collaborated in development of an autonomous obstacle avoidance system for the Mars Rover using Python and ROS
- Conducted research on space exploration technologies, contributing to papers and presentations on aerospace innovation

Casa Del Mar Beach Resort Remote
Web Developer - Freelance December 2021 - February 2022
- Engineered a responsive website using Bootstrap and jQuery, improving user navigation and engagement
- Executed SEO strategies, including keyword optimization and backlinking, increasing organic traffic by up to 30%

California Baptist University Riverside, CA
Event Coordinator June 2018 - April 2019

- Coordinated logistics for over 20 events, managing budgets and ensuring timely delivery of services
- Deployed Adobe Creative Suite for designing event themes, enhancing visual appeal and attendee engagement

United States Marine Corps Reserve (USMCR) Miramar, CA
7011 Expeditionary Airfield Systems Technician January 2014 - January 2018

- Maintained and repaired various systems and equipment at expeditionary airfields, including several different arresting gear models (M-31), airfield lighting MOSKIT/SALKIT systems, power generators, fuel systems, and other critical infrastructure
- Assisted with installation and setup of new systems and equipment as needed, and troubleshot any issues that arose
- Ensured overall safety and security of the airfield by performing safety checks, enforcing safety protocols, and responding to emergencies as needed
- Coordinated maintenance and repair activities with other team members and ensured all systems and equipment were operating efficiently
- Worked as part of a team that constructed the Old Harbor runways in Kodiak Island, Alaska, providing essential infrastructure for the local Native community

EXTRA CURRICULAR ACTIVITIES

- Member of a rocketry group, contributing to payload design and data collection
- Traveled in a college travel club to Europe, exploring professional development, culture and history
- Selected for the Titans On The Road event, interacting with professionals at Universal and Telemundo Studios

CERTIFICATIONS

- Secret Security Clearance obtained during internship at NAVSEA
